

## Heart Murmur Grading Chart

|   |  |
|---|--|
| 1 | Barely audible   |
| 2 | Can be consistently heard with a stethoscope   |
| 3 | Can be heard as soon as a stethoscope is applied   |
| 4 | Very loud, audible with stethoscope barely touching chest (murmur can be felt with hand over chest on heart) |
| 5 | Very loud, audible without the stethoscope; palpable trill   |
| 6 | So loud it can be heard without a stethoscope  |
